

At Market Research Future (MRFR), we enable our customers to unravel the complexity of various industries through our Cooked Research Report (CRR), Half-Cooked Research Reports (HCRR), Raw Research Reports (3R), Continuous-Feed Research (CFR), and Market Research & Consulting Services.

MRFR team have supreme objective to provide the optimum quality market research and intelligence services to our clients. Our market research studies by products, services, technologies, applications, end users, and market players for global, regional, and country level market segments, enable our clients to see more, know more, and do more, which help to answer all their most important questions.

In order to stay updated with technology and work process of the industry, MRFR often plans & conducts meet with the industry experts and industrial visits for its research analyst members.

Description:

Automotive Position Sensors Market Scenario

Automotive Position Sensor Market is expected to register a high growth at a rate of around 8% and reach USD 2 billion by 2022

The growth in the Automotive Industry directly translates into increasing demand in the Automotive Position Sensor market. Recent trends in the automotive industry with rapid technological development and revolutionized the automotive industry through automation and digitization are going to provide ample opportunities for growth and development. The changing focus of the Automotive Industry to technological trends such as autonomous driving, connectivity, and electrification is expected to boost the demand in the Automotive Position Sensors market. Increasing the integration of position sensors in vehicles portray a positive outlook of continuous growth in the Automotive Position Sensor market. Stringent Government regulations regarding automobile safety and increasing global car production at a rate of 4% have also significantly contributed to the growth of this market.

Segments

The Automotive Position Sensor market has been segmented on the basis of type as Multi-axis, Angular, and Linear. On the basis of Vehicle type the market has been segmented as High end, Mid End, Low End and electric.

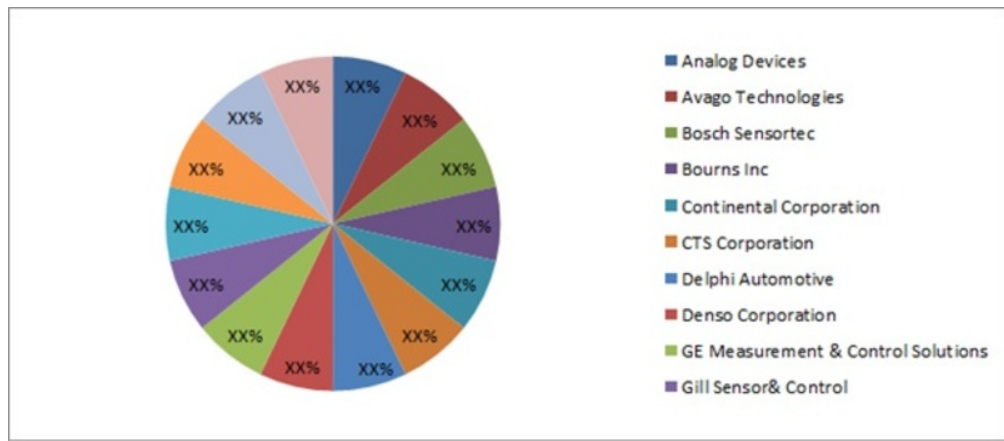

Regional Analysis of Automotive Position Sensors

Europe and North America has been the leading regions for the Automotive Position Sensor market mainly due to the existence of various major players in this region. With rapid technological development the Position sensor market in this region is expected to show high growth. Asia-Pacific is another region which is showing high potential mainly due to the increase in the number of passenger vehicles in this region.

Key Players

Some of the key players in the Automotive Position sensor market are Analog Devices Inc, Avago Technologies, Bosch Sensortec GMBH, Bourns Inc, Continental Corporation, CTS Corporation, Delphi Automotive, Denso Corporation, GE Measurement & Control Solutions, Gill Sensor& Control, Hella KGAA, Infineon Technologies, NXP Semiconductors, Sensata Technoliges, TRW Automotive INC, Stoneridge INC.

Global Automotive Position Sensors Market, by Market Share, 2016-2022 (USD Million)

Thus the Automotive Position Sensor Market is expected to register a high growth at a rate of around 8% and reach USD 2 billion by 2022. Study Objectives of Automotive Position Sensors Market

- To provide detailed analysis of the market structure along with forecast for the next 6 years of the various segments and sub-segments of the Global Automotive Position Sensors Market
- To analyze and provide insights about factors affecting the market growth
- To Analyze the Global Automotive Position Sensors Market based on various factors- price analysis, supply chain analysis, porters five force analysis etc.
- To provide historical and forecast revenue of the market segments and sub-segments with respect to respect to regions and their respective key countries
- To provide country level analysis of the market with respect to the current market size and future prospective
- To provide country level analysis of the market for segments by type, and by region
- To provide strategic profiling of key players in the market, comprehensively analyzing their core competencies, and drawing a competitive landscape for the market
- To track and analyze competitive developments such as joint ventures, strategic alliances, mergers and acquisitions, new product developments, and research and developments in the Global Automotive Position Sensors Market.

Intended Audience

- Automotive Sensors manufacturing companies
- Automotive Sensors service providers
- Automotive industry Consultants and Investment bankers
- Government as well as Independent Regulatory

Key Findings

The key findings of the report “Global Automotive Position Sensors Market” includes:

- The global market volume for automotive position sensors was around 1.3 billion units in 2014
- The global market value of automotive position sensors accounted for almost \$1 billion in 2014
- Electric vehicles sensors will be growing at the fastest CAGR at around estimated CAGR of 22.2%

Infographic Summary:

Global Automotive Position Sensors Market

Thus the Automotive Position Sensor Market is expected to register a high growth at a rate of around 8% and reach **USD 2 billion** by 2022. Study Objectives of Automotive Position Sensors Market

BY TYPE

- Multi-Axis,
- Angular
- Linear

BY VEHICLE TYPE

- High End
- Mid End
- Low End
- Electric

BY REGION

- North America
- Europe
- Asia-Pacific
- Rest of the World

Global Automotive Position Sensors Market Share, by Region

DRIVERS:

- Rapid technological development
- Revolutionized the automotive industry through automation and digitization.

RESTRAINTS:

- Stringent Government regulations regarding automobile safety.

KEY PLAYERS:

- Analog Devices Inc
- Avago Technologies
- Bosch Sensortec GMBH
- Bourns Inc
- Continental Corporation
- CTS Corporation
- Delphi Automotive
- Denso Corporation
- GE Measurement & Control Solutions
- Gill Sensor& Control
